

Luis Angel Marin Rodriguez

Skills

Programming Languages

- JavaScript
- Node.js
- TypeScript
- Python

Front-End Frameworks & Libraries

- React
- React Native
- Vue
- Redux
- Tailwind CSS
- Bootstrap
- Sass
- jQuery

Back-End & Databases

- PostgreSQL
- MongoDB
- DynamoDB
- Express.js

Summary

Full-Stack Developer with experience building web applications, internal tools and dashboards. Skilled in JavaScript, TypeScript, Python, React, Node.js, SQL and cloud solutions. Adept at turning requirements into working products end to end while collaborating with cross-functional teams and delivering high-quality software with automated tests. Committed to continuous learning and staying current with industry trends.

Experience

Nielsen — Quality Analyst — 8/25 - Present

Main tasks

- Developed 3 internal web applications that flag errors and inconsistencies in interviewer-collected data, provide feedback on deviations, and surface trends to managers, Quality Analysts and research interviewers.
- Automated data review and reporting workflows with Google Apps Script (Clasp), JavaScript and Python.
- Used GitLab and GitLab Duo for AI-assisted (agentic) coding to accelerate development and delivery.
- Built data-quality metrics and monitoring systems to ensure data integrity and completeness.
- Collaborated with QA and business stakeholders to deliver reliable, data-driven solutions end to end.

Key Achievements

- Automated over 20 manual data processes with JavaScript, Python and Google Apps Script (via Clasp), saving over 30 hours of manual tasks per week.
- Delivered 3 internal tools and dashboards adopted by over 300 users (Research Interviewers, Analysts and Managers), improving data visualization and automated reporting.

Location

Hybrid - Guadalajara, Jalisco

- Next.js
- Axios

Testing & QA

- WebDriverIO
- Playwright
- Jest
- Vitest
- Mocha
- Chai
- Cucumber
- Prettier
- ESLint
- SDLC / STLC

DevOps & CI/CD

- Jenkins
- GitHub Actions
- CI/CD Pipelines
- Docker
- Kubernetes
- Postman
- N8N

Cloud Platforms

- AWS
- Azure
- CloudFlare
- Vercel

Development Tools

- Git
- GitHub / GitLab
- Visual Studio Code
- GitHub Copilot
- Vite
- Bun
- Google Apps Script

Soft Skills

- English C2

Outlier — Full-Stack Developer — 2/25 - 8/25

Main tasks

- Developed and maintained web applications and REST APIs using React, TypeScript, Tailwind CSS and SQL.
- Evaluated responses from 4 different AI models against a rubric, selecting the best demo-app design.
- Fixed broken features and UX/UI errors in AI-generated code before submission.
- Reviewed AI-generated code to ensure it met company standards and was functional.
- Submitted corrected responses for AI feedback to improve model output quality and relevance.

Key Achievements

- Delivered over 50 demo applications by evaluating responses from 4 AI models against a rubric, selecting the best solution, and fixing broken features and UX/UI errors.
- Improved code quality and response accuracy by 8% through systematic review and optimization.

Location

Remote - Guadalajara, Jalisco

HCL Technologies — Underwriter (Data Quality) — 2/23 - 2/25

Main tasks

- Verified financial documents (pay stubs, tax returns, income statements) with meticulous attention to accuracy and compliance before approval.
- Analyzed credit bureau reports (Experian, Equifax, TransUnion) and internal protocols to make high-risk approval or decline decisions.
- Held lending authority up to $50k unsecured and $150k secured, minimizing risk while processing 50+ credit inquiries daily.
- Built web tools and automations (dashboards, calculator apps) with HTML, CSS and JavaScript that reduced manual effort for the department.

- Spanish Native
- Customer Relation
- Analytical
- Team Player
- Creative
- Excellent Communication
- Negotiation
- Working Hard

Web Portfolio

Download CV

- Evaluated office processes and suggested improvements to increase efficiency and data accuracy.

Key Achievements

- Processed 50+ loan inquiries per day — the highest throughput in the bank's underwriting department history.
- Approved decisions up to $150k secured / $50k unsecured while maintaining a strong compliance record (less than 2% error rate per year).
- Developed strategies to mitigate risk and fraud, enhancing the overall security and reliability of the lending process.

Location

Minerva Av Vallarta - Guadalajara, Jalisco

Education / Certifications

High School Diploma

UNE UNIVERSITY - 45400, Av. Tonaltecas 333, El Zapote, Tonalá, Jal.

Certifications

EPAM Systems

- Front End Development Advanced
- Automated Testing JavaScript Specialization
- Automated Testing JavaScript Advanced
- Automated Testing JavaScript

freeCodeCamp

- Responsive Web Design
- JavaScript Algorithms and Data Structures

- Front End Development Libraries
- Data Visualization

AWS

- AWS Cloud Practitioner
- AWS Artificial Intelligence Practitioner
